ABOUT ME

Motivated and hard-working Master's student in software engineering with a strong foundation in computer science, gained through academic studies and practical projects. My passion lies in building efficient and user-friendly applications while staying eager to learn and adapt to new technologies. Experienced in collaborating within diverse teams, I value open communication and shared learning to achieve project goals. Eager to continuously improve my skills and contribute to impactful projects that challenge me to grow both personally and professionally.

EXPERIENCE

Volunteer 2023 – present

Association 'Furniture and Wood'

- Web page management, translating, writing emails, and representing the association at industry fairs.
- Gained experience in communication, event management, and cross-cultural collaboration.

Math and Programming Tutor 2023 - present

Self-Employed

- Provided personalized tutoring in mathematics and programming, simplifying complex topics such as algorithms, data structures, and software development concepts for students of varying skill levels.

PROJECTS

HTML Generator

- AI tool that generates a web page based on a hand-drawn sketch provided by the user.

Marketing Campaign Management System

- System designed to manage marketing campaigns by serving HTML files or images to API calls coming from displays, facilitating the positioning of certain products via visual ads.

Book Club

- Platform designed for a local book club where users can share and discuss their favorite books with fellow club members.
